HTML and CSS: Navigation Menus

Navigation Bars

A navigation menu is simply a **list** of **links**

Two types of lists:

1. unordered list
2. ordered list

Use an unordered list ``

Links:

anchor tags → `Click me`

is sometimes used as a **placeholder** until we determine a link

Horizontal Nav Menu

Things to do in CSS:

```
ul {  
    padding: 0;  
    margin: 0;  
}
```

Horizontal Nav Menu

Things to do in CSS:

```
li {  
    list-style-type: none;  
    display: inline-block;  
}
```

Horizontal Nav Menu

Things to do in CSS:

```
a {  
    display: block;  
    text-decoration: none;  
}
```

Add some :hover to your nav menu

Try adding this to your codepen.io nav menu.

```
a {  
  display: block;  
  text-decoration: none;  
  padding: 10px 15px;  
  background: tomato;  
  color: white;  
}
```

```
a:hover {  
  color: tomato;  
  background: white;  
}
```

Replace tomato and white with whatever colors you want.

Full width nav menu

1. Put your `` in a div, give the div an id
2. Select it in CSS and give it a width of 100% and a background color

Example:

```
#nav {  
    width: 100%;  
    background: tomato;  
}
```
